*Election/Restrictions*

1. Upon initial review of the claims it appears that claims 1-32 differ in subject matter and therefore require a different search. In accordance with this a restriction is deemed proper.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-23, drawn to a display in a Graphical User Interface, wherein the interface permits the user to conduct administrative operations or perform observations of the current state of the components, classified in Class 345, subclass 736.

Group II. Claims 24-32, drawn to a display in a Graphical User Interface, wherein the user is able to author, create, or manage the user interface, classified in Class 345, subclass 762.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions Groups I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, while invention Group I has separate utility such as network managing or monitoring status, invention Group II is directed to user interface development/creation. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, and because the searches for the individual Groups are not coextensive, restriction for examination purposes as indicated is proper.

Art Unit: 2174

4. A telephone call was made to Michael R. Cammarata on 07/19/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
